

Total Senior Home Health

"The Center of Wellness is Within the Home."

What is Home Health Care?

[Click Here To Find Out More...](#)

Our Home Health Care Team provides quality nursing care to patients directly in their homes. We assist patients in maintaining and improving their quality of life – at home – because there is no place like home. We are dedicated to educating and empowering patients to take charge of their own health.

Our People. Our people are highly trained and dedicated home health care professionals, with a passionate commitment for quality and service.

Our Approach. Our team of highly trained nurses, therapists, social workers, and home aides works closely with the patient’s physician to address their individual needs and provide quality patient-focused home care. Through the coordination of care with physician, patient, health care professionals, and family members, each patient is provided with an individualized care plan

Our Services. Our services are guided by the belief that providing patients with more and better information leads to greater independence, quicker recovery, a higher level of satisfaction and reduced incidence of hospitalization. Service offered:
